

UBI 506 – Operating Systems. Homework 2. Due Date 16/03/2018

What are the possible outputs, if we run the following program? (Assume that the pid of parent process is 5012 and the pid of child process is 198)

```
int main(int argc, char **argv)
{
    int x=1;
    pid_t pid = fork();
    x++;
    cout<<pid<<" ";
    cout<<x<<" ";
}
```
