

- The midterm exam of the course UBI 503 Data Structures and Algorithms for Fall 2025 semester will take place on Tuesday, November 18, 2025 at 09:30 AM in the seminar room of the International Computer Institute.
- The exam is closed book. However, the students can prepare one sheet of paper (with A4 size) for his/her notes and use this sheet during the exam.
 - Students are allowed to fill two pages of the same sheet with their notes.
 - Sheets can be hand-written or printout.
 - Each student should prepare and use his/her own sheet. Any copied sheets will be discarded.
- Exam will cover all topics discussed in the lectures. Most of the questions will aim at measuring the structured programming and algorithm design capabilities of the students by having students writing C codes or expecting from the students to comment on a written C program. A little portion of the questions may also cover the measurement of the students' knowledge about the learned data structures and algorithms.
